

# HORMOTONE

in disorders of

## MENSTRUATION

and the

## MENOPAUSE

Hormotone supplies the physiological stimulus to the endocrine glands whose functional activity determines the normal menstrual flow.

When these internal secretions begin to fail at the period of the menopause, Hormotone acts both by substitution and homostimulation.

Dose: 1 or 2 tablets three times daily.

In cases of high blood pressure use

**Hormotone Without  
Post-Pituitary**

## BANDAGE

### Ace Bandages are Economical

They possess the elastic qualities of rubber bandages, but contain no rubber. They can be sterilized by boiling. The porous weave insures coolness and comfort. The soft, feathered edges will not ravel.

Ace Bandages stretch without narrowing, roll evenly without need of reversing, fit comfortably and exert a constant firm pressure where needed.

Ace Bandages are indicated in the treatment of varicose veins, sprains, dislocations, ulcers, swelling and weak joints, post-operative work, seasickness, abdominal, breast and fracture support, also for bandaging the chest and abdomen of children to relieve strain in severe cases of whooping cough.

Width—2-2½-3-3½-4-5-6-8-10 Inches  
Length—5½ Yards Stretched.

# Complete asepsis possible with Castle sterilizers

Minor surgical cases and some treatment work must be conducted with complete asepsis.

Is this possible with your present office equipment? Most any sterilizer will sterilize, but a CASTLE goes farther: it virtually guarantees an unbroken sequence in your aseptic technique.

Take for example the instrument sterilizer on the No. 1316-A shown here. The combined tray and cover lift allows instruments to be removed without contaminating them or your hands. Also in the water sterilizer all the water is boiled *continuously*, and there is no unsterile water in the gauge glass.

## DIABETIC BREAD

Palatable starch and sugar-free Bread, Muffins, etc., are easily made in the patient's home from

(Accepted by The Council A. M. A.)

**LISTERS PREPARED CASEIN DIABETIC FLOUR** is self-rising and free from starch and sugar. It is put up in individual boxes, enough flour in each box to make one loaf of bread, six muffins, etc.

Ask us for the nearest Lister Depot or order direct from us.  
We do not sell cooked foods.

Lister Bros., Inc. 405 Lexington Ave., New York

Physicians welcome the facility with which it is now possible to maintain synchronously the patient's nourishment and control the sugar secretion through the employment of a low carbohydrate flour.

Diaban muffins are utilizable with or without insulin in mild or severe types of the malady, and their delicious flavor is a boon to the patient that hitherto he has been denied.

One Diaban muffin contains less than one third as much carbohydrates and only twice as much protein as found in an equal quantity of wheat bread. One package of Diaban Flour (2 days supply) makes 12 muffins, each muffin containing 5.0 grams carbohydrates, 5.3 grams protein, 3.3 grams fat, 71 calories.

Analysis and directions on every package. Diaban Flour is uniform and analysis always dependable. Physician's circular sent upon request.

## MALNUTRITION

**T**ISSUE waste due to malnourishment, intolerance to food, impairment of the digestive functions and anorexia, high lights in the clinical picture of malnutrition, are amenable to diet and diet regulation particularly when "Ovaltine" is included in the dietary scheme.

For "Ovaltine" permits of protein liberality without impairment of digestion. Its proteins include leucosin and bynedestin of Winter Malted Barley and the phosphoproteins and albumins of Milk and Eggs, unimpaired by process of manufacture, easy of digestion and assimilation.

The enzymes of "Ovaltine" aid powerfully the digestive function by their hydrolytic action upon the starchy carbohydrates and their power to modify the curd of cow's milk, the digestibility of which is increased twofold by the use of "Ovaltine."

Then, too, when there is food intolerance or anorexia clinical evidence shows that "Ovaltine" is well borne and that it appeals to the appetite even of the most fastidious.

# SILVER IODIDE IN A NEW ROLE NEO-SILVOL COLLOIDAL SILVER IODIDE

NEO-SILVOL contains 20% of Silver Iodide in colloidal form. It makes an opalescent, milky solution in water, one that leaves a scarcely perceptible stain on drying. These solutions do not irritate the skin or mucous membrane to which they are applied, and their germicidal activity has been fully demonstrated by bacteriological and clinical tests.

The indications for the use of Neo-Silvol include conjunctivitis, gonorrheal ophthalmia, naso-pharyngeal infections with or without sinus or antral complications, cystitis, and acute and chronic urethritis of gonorrheal origin.

One medical author reports one injection (by catheter) of 5 cc of a 10% solution of Neo-Silvol is giving him excellent results in the acute cystitis of young children. He also finds it one of the best remedies he has ever used in the treatment of pyelitis, introduced by way of the ureter.

Neo-Silvol is equal to carbolic acid as a germicide, and twenty times as fatal to the gonococcus.

NEO-SILVOL is supplied in 1-oz. bottles of the granules and in 6-grain capsules, 50 to the bottle. One capsule makes one fluid drachm of a 10% solution.

# The GLEN SPRINGS

WATKINS GLEN, N.Y.

WM. E. LEFFINGWELL, PRESIDENT

THE attention of the medical profession is invited to the superior facilities offered by The Glen Springs for the reception of guests requiring rest, dietary and hygienic regulation under experienced medical supervision.

ESPECIALLY suitable for reference by physicians are the following conditions:—

CONVALESCENCE FROM  
RECENT ILLNESS  
CARDIO-VASCULAR DISTURBANCES  
RHEUMATIC CONDITIONS  
CHRONIC FATIGUE STATES

THERE is no hospital or institutional atmosphere about The Glen Springs—a feature appreciated by physicians when recommending appropriate guests. Members of family or friends who might accompany referred guests will also find restful enjoyment during their stay.

A splendid golf course, delightful walks and other outdoor amusements are available under proper conditions.

THE facilities include Nauheim

Baths, given with natural calcium chloride brine; equipment for hydrotherapy, electrotherapy and mechanotherapy—under specialized professional direction; clinical and X-ray laboratories and electrocardiograph.

RAILWAY communications:—

On the Pennsylvania, Lehigh Valley and New York Central Railroads. Connection at Elmira with the Lackawanna and Erie.

# Pinestrine

*The Healing and Soothing Antiseptic*

## CONSTITUENTS

*Pinus Pumillio, Thymol, Menthol, Eucalyptus, Gaultheria, Baptisia, with Benzoic and Boric Acids*

(a) As a gargle Pinestrine relieves the inflamed membrane, removes the hoarseness and soreness of the throat, leaving a refreshing feeling in the mouth.

(b) In surgery it provides an effective means of conveying to the innermost fold of the mucous membrane the bland and healing antiseptic properties of its constituents. As a deodorant its agreeable aroma will at once be appreciated.

(c) The antiseptic action of Pinestrine is prolonged, due to the fact that when applied and after evaporation has taken place, a thin coating of the combined Benzo-Boracic Acids is formed on the applied surface.

*A copy of "Pinestrine in Respiratory Diseases" also a liberal sample of Pinestrine promptly sent to physicians on request.*

# In step with modern medicine— Kellogg's ALL BRAN

**M**ORE and more, every day, modern medicine is seeking to prevent, rather than cure. Right in line with this generous ambition lies the work that Kellogg's ALL-BRAN is doing.

Of course, Kellogg's ALL-BRAN **relieves** constipation. Doctors and nurses who have tried it are generous in their praise. **They know** that it does everything claimed for it. Because it's ALL-BRAN, it can do its work—thoroughly. Anticipated results never fail.

But Kellogg's ALL-BRAN is equally valuable in **preventing** constipation. It has the necessary bulk. And, very important, too, it is really appetizing. Patients who are not conscious of the necessity for medicine are willing to take it. Crisp, delicious, cooked and krumbled by the special Kellogg process, Kellogg's ALL-BRAN is a delightful food.

Kellogg's ALL-BRAN is sold by all grocers.

What B. P. is to drugs,  
ALL-BRAN is to bran foods,

## LIQUID PEPTONOIDS WITH CREOSOTE

COMBINES the active and known therapeutic qualities of creosote and guaiacol with the nutritive properties of Liquid Peptonoids and is accordingly a thoroughly dependable product of definite quantities and recognized qualities as shown by the formula:

*Each tablespoonful represents*

ALCOHOL (By Volume) .....	12%
PURE BEECHWOOD CREOSOTE .....	2 min.
GUAIACOL .....	1 min.
PROTEINS (Peptones and Propeptones) .....	5.25%
LACTOSE AND DEXTROSE .....	11.3%
CANE SUGAR .....	2.5%
MINERAL CONSTITUENTS (Ash) .....	0.95%

It acts as a bronchial sedative and expectorant, exhibiting a peculiar ability to relieve *Bronchitis—acute or chronic*. It checks as well a persistent winter cough and without harsh or untoward effect. It is agreeable to the palate and acceptable to the stomach—with merit as an intestinal antiseptic. Supplied in 12 oz. bottles.

*Samples on request*

# Why tea and coffee should be driven from the diet of children

**E**ARLY in your study of medicine you learned that children should not drink tea or coffee—that the caffeine they contain is particularly vicious in its action on the nervous system of a child.

There is a wealth of experimental data to show that what you learned is more than theory.

An unusually compelling warning to fathers and mothers is presented by C. K. Taylor, as reported in *The Psychological Clinic*.

Taylor found that children who were allowed coffee regularly averaged 1.5 to 4 pounds less in weight, 0.5 to 1 inch less in height and up to 3 pounds less in hand strength when compared with children who drank no coffee at all.

According to Taylor's study, coffee had an equally appreciable effect on children's mental growth. The average ranking in lessons was 2.6% less for children who drank coffee daily.

Those who drank four cups or more daily averaged as much as 9.6% less than those who drank none.

You, in common with all physicians, urge a milk diet for the average child. But you know how difficult it sometimes is to enforce your recommendation. Some children dislike the taste of milk. In others the imitative instinct makes them clamor for the beverages of their elders. It is here that Postum can aid you. Instant Postum made with hot (not boiled) milk has all the body-building virtue of milk, plus the nourishment of whole wheat.

To-day Postum is the choice of thousands of families who bar beverages containing drugs from their tables. They like its distinctive Postum taste.

Much of Postum's popularity springs from the fact that thousands of physicians know Postum and endorse it.

We will be glad to send the physician or nurse addressing us a full-size package of Instant Postum or of Postum Cereal (the kind you boil).

## The Retention of Intestinal Poisons

is now recognized as the chief factor in the causation or aggravation of many acute and chronic ills. The immediate removal of these poisons is always imperative, and to accomplish this there is no remedy more effective than AGAROL COMP.—a delightfully palatable and well balanced preparation of mineral oil, agar-agar and phenolphthalein.

*AGAROL COMP.* not only assures prompt and satisfactory elimination, with gratifying relief from the influence of retained poisons, but presents the further advantage of promoting permanent restoration of normal bowel function.

Thus its *ingredients* mix thoroughly with the bowel contents—the oil softening and lubricating the fecal mass, the agar-agar retaining moisture and increasing its bulk, while the phenolphthalein furnishes the initial impulse that starts the peristaltic wave.

Not only will satisfactory elimination be accomplished without delay, but as a result of the continued effect of Agarol Comp. on the secretory and mechanical processes of the bowel, regular evacuations will follow naturally without requiring the aid of any further medication.

AGAROL is the *original* Mineral Oil—Agar-Agar Emulsion, and has these special advantages: Perfectly homogenized and stable; pleasant taste without artificial flavoring; freedom from sugar, alkalies and alcohol; no contraindications; no oil leakage; no griping or pain; no nausea or gastric disturbances; not habit forming.

# THE NEW YORK POLYCLINIC MEDICAL SCHOOL AND HOSPITAL

(ORGANIZED 1881)

*(The Pioneer Post-Graduate Medical Institution in America.)*

*We Announce*

FOR THE GENERAL SURGEON

*A nine months combined surgical course comprising*

General Surgery, Traumatic Surgery, Abdominal Surgery, Gastro-Enterology,  
Proctology, Gynecological Surgery, Urological Surgery, Neuro-Surgery,  
Laboratory and X-Ray Diagnosis.

*Course so outlined that students may arrange for three months if unable to complete the entire course.*

FOR INFORMATION ADDRESS

THE DEAN, 345 West 50th Street, NEW YORK CITY

# New York Post-Graduate Medical School and Hospital

Courses in SURGERY, GYNECOLOGY AND UROLOGY Are Open to Qualified Physicians

For information write to THE DEAN, 311 East 20th Street, NEW YORK CITY

## HERMAN KNAPP MEMORIAL EYE HOSPITAL SCHOOL OF OPHTHALMOLOGY

An eight months' course is open to qualified practitioners.  
Instruction is given in the following subjects:

- |                                  |                                 |
|----------------------------------|---------------------------------|
| 1. Daily Clinics in Dispensary.  | 7. Physiological Optics.        |
| 2. Refraction.                   | 8. Operative Surgery.           |
| 3. Ophthalmological Quis.        | 9. Pathology.                   |
| 4. Muscular Anomalies.           | 10. Ophthalmological Neurology. |
| 5. Ophthalmoscopy.               | 11. Diagnosis.                  |
| 6. External Diseases of the Eye. | 12. Slit Lamp.                  |

A new course starts January, April, July and October 1st. A  
vacancy on the house staff will occur April 1, 1925.

## ANASARCIN IN BRIGHT'S DISEASE

Nephritis is always a cardiovascular-renal condition. You cannot separate the three cardinal factors—the heart, the vessels and the kidneys. They are three stations on one functional circuit.

### Decompensation is a Constant Menace in Nephritis

The increased burden which the disabled kidneys throw upon the heart produces the same compensatory effort that organic heart disease does—and the same danger of failure.

To whatever extent the vascularity of the kidneys can be called upon, Anasarcin will assist in maintaining or restoring compensation.

ANASARCIN is particularly adapted to cardio-vascular-renal disorders, because it relaxes all the peripheral arterioles, and promotes renal functionation, not by harmful stimulation of the renal cells, but by physiologically flooding the kidneys with arterial blood.

ANASARCIN TABLETS will be found an excellent therapy in those cases of Bright's disease where the vascularity of the kidneys is still in evidence, and where decompensation threatens.

*Write for Literature and for Samples.*

## HALITOSIS

(AS DEFINED IN THE CENTURY DICTIONARY)

(Hal-i-to-sis) N. N. L.

(L. Halitus—Breath .. Osis—Offensive)

Offensive breath, whether arising from diseased or neglected conditions of the teeth, mouth or nose, or caused by disorders of digestion, respiration, the excessive use of tobacco, etc., may be readily overcome by the deodorizing properties of—

## LISTERINE

Listerine is strictly antizymotic, it inhibits alike the acid fermentation of carbohydrates and the alkaline putrefactive processes of mixtures of meat and saliva, retained as debris about the teeth; hence, Listerine is antagonistic to the activating enzymes of fermentation so often the cause of Halitosis.

The volatile antiseptic constituents of Listerine—thyme, eucalyptus, gaultheria and mentha, combined with baptisia, boric acid, rectified spirits and water have a stimulating effect upon the stomach and in proportion to the dose, an action inhibitive to fermentation of its contents; hence, Listerine is often corrective of these disorders associated with the endo-development of gases and acid eructations. A large tablespoon of Listerine in a wine glass of hot water will afford immediate relief.

## I N D I C A T E D

# Intrabdominal abscesses

Zonite (stabilized electrolytic sodium hypochlorite) is proving markedly effective in the treatment of these conditions; whether the abscess be appendiced or in the uterine appendages, subdiaphragmatic, result of gall bladder rupture or secondary collections, etc.

In walled-off cases, the Carrel tube instillation is immediately employed. But before the walled-off process has fully taken place the insertion of gauze packings or rubber cof-ferdams is beneficial.

In the removal of the gauze, the cavity should be irrigated with the solution to dissolve blood clots and exudates and loosen the dressing. Smears should be taken and sent to a laboratory for bacterial count.

A digest of various applications of Zonite to medical practice has recently been compiled. May we send you a copy of it, gratis, together with a trial supply of the solution?

## Coughs - Colds - Calcreose

Inflammations of the Respiratory Tract are of common occurrence at this time of year. Creosote is of value in the treatment of these conditions, but causes disagreeable by-effects, which necessitates its discontinuance.

Calcreose (calcium creosotate), a loose chemical combination containing approximately equal weights of creosote and calcium hydrate, differs from creosote in that it apparently does not have any untoward effect on the stomach.

# This Vaginal Tampon liberates Glycerine *gradually*

**T**HE most efficient vaginal tampon is one which, containing a high glycerine content, is so compounded that when it is packed around the cervix, the glycerine can be liberated *gradually*, thus prolonging the beneficial action of depletion.

Antiphlogistine, used as a Vaginal Tampon, not only accomplishes this, but the large c. p. glycerine content of Antiphlogistine, combining with the liquid exudate present, sets up an acceptable degree of heat with consequent ease and relief to the patient.

*Use this easy way to make  
this efficient Tampon*

Heat the Antiphlogistine to the required temperature, place a quantity of it in the centre of a square of

gauze, as shown in Fig. 1; gather the gauze up around the Antiphlogistine, taking care to leave the ends of the gauze free so that they may act as a drain as shown in Fig. 2. Use a suitable speculum, packing the tampon snugly around the cervix.

*"Pregnancy—its signs and complications"*

is the title of a 16-page booklet *free* to all Obstetricians and Gynecologists. May we send you one?

It treats of the acknowledged use of Antiphlogistine in Mammary Abscess, Phlegmasia Alba Dolens, Mastitis, Post Partum Metritis, Fissured Nipple, Caked Breast, Vulval Edema, Hemorrhoids, Retention of Urine, Obstinate Neuralgia, Sub-Involuted Uterus, Adenitis.

# Petrolagar

(Trade Mark)

## A Warning Against Imitations

Imitations flock in the wake of success. It has been brought to our notice that the success of PETROLAGAR has developed some imitators, several packed similar to our product.

None of these imitators has, however, succeeded in producing a product which equals PETROLAGAR in therapeutic action or taste.

The process by which the mineral oil is diffused with the agar-agar in PETROLAGAR was developed after a great deal of research and experiment. It results in the palatable, non-irritating emulsion which gives full lubrication, and which contains 65 per cent of mineral oil. It gives a bland gelatinous bulk in the intestine. There is no oily taste or after-taste, and the white creamy emulsion has a most attractive flavor.

PETROLAGAR has won its way to a pre-eminent position in its particular field by performance on clinical test.

It has been accepted by the Council on Pharmacy and Chemistry of the American Medical Association for New and Non-Official Remedies.

It is prescribed by leading physicians in every section of the country for the treatment of constipation.

It is stocked by the prescription pharmacy. Complete formula on every package.

Sold in strict conformance with ethical medical procedure, by a house which *does not* advertise any article to the public.

**PETROLAGAR is issued as follows: PETROLAGAR (Plain); PETROLAGAR (With Phenolphthalein); PETROLAGAR (Alkaline) and PETROLAGAR (Unsweetened, no sugar).**

WE PUT IT THROUGH MORE THAN  
20 DIFFERENT PROCESSES THAT IT MAY REACH  
YOU STERILE AND ABSORBENT

You can drop a dab of this cotton into a tumbler of water and it will instantly sink. You can remove it and it will hold water amounting to more than 20 times its own weight. That is great absorbency which only cotton treated in our way can claim. Its purity exceeds even the exacting requirements of the U. S. Phar-

macopoeia standards. There is no secrecy to its sterility. Any cotton can be made sterile. It is merely a question of the manufacturer being willing to incur the added cost to do it. There have been times when just this one feature—sterility—has meant an actual loss to us on every pound we sold.

## Patients Who Have An Aversion to Plain Liquid Petrolatum

Such patients will find Cream of Nujol with Agar is smooth, creamy and of an exceptionally pleasant flavor. Infants and children take it readily because of its palatability.

Cream of Nujol with Agar is an effective lubricant in all types of intestinal stasis. During its passage along the intestinal tract it mixes with and softens the feces. Thus the fecal waste is kept soft, and is passed easily through the system and evacuated without straining.

This preparation contains no cathartic, saccharin or sugar ingredient. Hence it may be prescribed with perfect safety for obese or diabetic patients.

Where no aversion to the taste of plain Liquid Petrolatum exists, Nujol will be found the ideal intestinal lubricant.

We shall be very pleased to send you a 9-oz. sample of Cream of Nujol with Agar upon request.

	Dry	Liquid*
Butterfat .....	8.00%	3.33%
Casein .....	21.28%	2.53%
Albumin .....	5.46%	.65%
Lactose .....	38.00%	4.53%
Ash .....	5.76%	.69%
Water .....	1.50%	88.27%
Calories (per ounce)	149.	18.

\*4½ ounces to a quarter of water.

**KLIM is completely soluble in water of any temperature.**

**When used in Infant Feeding Reliquified KLIM at normal strength has the same analysis and caloric value as natural whole cow's milk and is subject to the same modifications when used in infant feeding.**

### CANADIAN MILK PRODUCTS BRAND POWDERED PROTEIN MILK

is unquestionably one of the safest prophylactic preventatives for young infants. Its composition is high in lactic acid organisms, extremely low in milk sugar, thus fulfilling the requirements of the highly successful formula developed by the Hospital for Sick Children in Toronto.

KLIM is standardized to 3.33% butterfat content when liquid, or 28% when dried. When KLIM is reliquified the butterfat, in fine globular division, remains in perfect emulsion.

A cream line cannot fail frequently to create differences in the fat content of the baby's bottle or the child's ration. In the latter case the cream too often finds its way to the parent's coffee. KLIM eliminates these hazards.

*Samples and literature are sent upon request  
to physicians only*

### CANADIAN MILK PRODUCTS Limited TORONTO

*Also makers of C.M.P. Powdered Protein Milk*

*Literature and samples  
sent promptly upon request*

### ANNOUNCEMENT

Recognizing the importance of scientific control all contact with the laity is predicated on the policy that KLIM may be used in infant feeding only according to physicians' formula.

Pharmacists obtain KLIM direct from the Canadian Milk Products Limited. If not available to your patients we will supply your pharmacist upon your recommendation.

*Samples will be gladly sent upon request.*

### IMPORTANT to PHYSICIANS ESPECIALLY GYNECOLOGISTS

Progressive Gynecologists and Physicians in general will welcome the advent of Pond's Tampon which offers an easy, safe and thorough method of vaginal and uterine medication. It combines the medicinal function of a vaginal suppository with the mechanical support offered by a correctly shaped tampon, ensuring the continued application of the medicament to the diseased areas and at the same time furnishing the necessary support.

The various treatments to which the tampon is adaptable will be at once apparent to the physician, but lacerations, leucorrhoea, gonorrhoea, prolapse, post-operative and post-confinement treatment, and uterine hemorrhage are some of the conditions in which Pond's Tampon offer new and most effective treatment. There are many unique points of advantage in treatment by Pond's Tampons.

Pond's Tampons are packed in six tampons to a box and are made in the following medication:

**A**—Ichthylol Compound, Glycerine and Boro-Glyceride 50%, Ichthylol 2.5%. Resublimed Iodine 1.4%, Carbolic Acid (absolute Phenol) .5%, Powdered Hydrastis 1%. **B**—Ichthylol 10%, Glycerine and Boro-Glyceride 50%. **C**—Protargol and Ichthylol (Each 2%), Glycerin and Boro-Glyceride 50%. **D**—Opium, Belladonna and Hyoscyamus, Glycerin and Boro-Glyceride 50%. Powdered Opium 2 grains. Extract of Belladonna 1 grain. Extract of Hyoscyamus 2 grains. **E**—Glycerole of Tannin 50%. **F**—Ichthylol Compound with Silver Iodide. Glycerin and Boro-Glyceride 50%, Ichthylol 2.5%, Iodine .14%, Phenol .5%, Powdered Hydrastis 1%, Silver Iodide (made soluble by Potassium Iodide) 1%. **G**—Glycerin and Boro-Glyceride, Glycerin and Boro-Glyceride 50%. Resublimed Iodine .25% **H**—Plain Glycerin Gelatin base.

Full information and samples will be gladly furnished to physicians addressing us on their own stationery.

# Nutrition in Infancy

Viol supplies all classes of body-building material.

It restores the balance of the diet by supplying those essential food elements so often lacking in ordinary diet during the age of growth.

*Viol contains : Bone Marrow, Beef fat, Malt extract, Lemon Juice and Salts of Lime and Iron.*

*Free samples will gladly be supplied to medical men on request.*

Its vitamin content has been investigated in the Bio-Chemical Laboratories of the University of Cambridge, whose report states that "the vitamins are present in the manufactured article as it reaches the public."

The valuable constituents of Viol, and especially the fat soluble A, are presented in a form so palatable and so easily assimilated that the weakest digestions are not disturbed.

Medical men will realise that this is often the determining factor in the dieting of malnutrition and wasting conditions, and with ill-developed children.

# Controls Hyperacidity

## Without Inflating the Stomach

"Phillips' Milk of Magnesia" has a Powerful Affinity for Acids, forming Harmless Compounds that are Readily Excreted.

When you prescribe sodium bicarbonate to control gastric hyperacidity, only a portion of it is effective. The rest is converted into useless carbon dioxide and lost. Not only that, but in some cases, as in pyloric obstruction or gastric ulcer, the great distension of the stomach by the rapidly evolving gas may prove painful or even dangerous.

"Phillips' Milk of Magnesia" contains no carbonates. Hence no gas is given off when it combines with an acid. It is a simple suspension of magnesium hydroxide in pure water—nothing more. It has the formula  $Mg(OH)_2$ . The particles of magnesium hydroxide are in a state of exceedingly fine subdivision. Every tiny particle is available to attack and hold in combination its chemical equivalent of the acid molecule. Therefore, in its use there is no waste of material. It is one hundred per cent effective.

### INDICATIONS

Phillips' Milk of Magnesia is essentially antacid and mildly laxative. It is specifically indicated in pyrosis or hyperchlorhydria; acute, subacute, and chronic gastritis, nervous dyspepsia, gastric and duodenal ulcer, nausea and vomiting of infants and adults, the nausea of pregnancy, infantile summer diarrhoea and constipation. It is

of marked value in combating auto-intoxication by acid products of metabolism occurring in diseases affecting the nutritional and metabolic processes, as rheumatism, gout and diabetes. Its use maintains the normal state of blood alkalinity and reduces the acidity of the urine in cystitis and urethritis. Dentists, generally, recommend Phillips' Milk of Magnesia to control oral acidity and prevent caries. It is an ideal dentifrice.

**Note.** One tablespoonful of Phillips' Milk of Magnesia contains twelve grains of pure magnesium hydroxide and in neutralizing power is equivalent to 44 grains of sodium bicarbonate or  $1\frac{1}{2}$  pints of lime water.

### DOSAGE

The usual dose of Phillips' Milk of Magnesia, as an antacid, ranges from one teaspoonful (4 c. c.) to one tablespoonful (16 c. c.). This amount should be mixed with an equal portion of cold water or milk and given half an hour after meals.

For its laxative effect, the adult dose is one to two fluid ounces (30 to 60 c. c.). The aperient action may be facilitated by giving the juice of lemon, lime or orange, half an hour thereafter.

# PHILLIPS' Milk of Magnesia

**CAUTION.** The physician is advised to beware of imitations of Phillips' Milk of Magnesia. The genuine product bears our registered trade-mark. Kindly prescribe in original 4-ounce and 12 ounce bottles obtainable from druggists everywhere.

## *Harnessing the White Horses of our waters~*

Industries tend to concentrate at the sources of raw materials. That is why Canada is bound to grow greater, for within the confines of this Dominion are the forests, the mineral lands and the unlimited water powers which are the conditions that make industrial growth inevitable.

Water power is the key both to the development of our other natural resources and to our industrial expansion. Without it, for example, our great pulp and paper industry could not have been developed to the present scale.

In no way can the future prosperity of Canada be anticipated better than by the purchase of Hydro Electric Securities. They offer one of the best mediums of investment in corporation securities.
